

ROHIT VERMA

Java | Spring Boot | React.js | Full Stack Developer

Email: rohit729verma@gmail.com

Mobile: +91-9039689781

Current Location: New Delhi, Delhi, India

GitHub: <https://github.com/rohitkain729>

Portfolio: <https://rohit-portfolio-ndf7.onrender.com>

PROFESSIONAL SUMMARY

- **Java Developer with 5 years** of professional experience in developing web-based enterprise applications using Java, Spring Boot, Spring MVC, Hibernate, JPA and REST APIs.
 - Strong hands-on experience with Spring Boot for developing RESTful APIs, business logic, database integration and enterprise applications.
 - Good knowledge of Core Java, including OOP, Collections, Exception Handling, Serialization and Java 8 features.
 - Experience with Spring Security, JWT Authentication and Authorization and role-based access control.
 - **1.5 years of hands-on experience with React.js** for developing responsive and component-based web applications.
 - Experience in consuming REST APIs from React.js applications using Axios.
 - Working knowledge of Node.js and Express.js for backend API development.
 - Experience with MySQL and PostgreSQL using Hibernate and JPA.
 - Working knowledge of Microservices architecture and RESTful services.
 - Basic knowledge of Apache Kafka and practical knowledge of JMS messaging.
 - Hands-on practice with Spring Boot JMS, ActiveMQ, message producers, consumers and queues.
 - Experience with Git, Maven, Gradle, Postman, Jenkins and Tomcat.
 - Basic knowledge of design patterns including Singleton, Factory and DAO.
-

PROFESSIONAL EXPERIENCE

BROMINE INFOTECH

Java / Spring Boot Developer

Location: New Delhi, Delhi, India

Employment: Jan 2021 – July 2023

Key Responsibilities

- Developed and maintained enterprise web applications using Java and Spring Boot.
- Developed RESTful APIs using Spring Boot.
- Implemented business logic using layered architecture with Controller, Service and Repository layers.
- Used Spring Dependency Injection for application component management.
- Worked with Hibernate and JPA for database operations.
- Worked with MySQL/PostgreSQL databases.
- Implemented and consumed REST APIs.
- Worked with Spring Security and JWT-based authentication and authorization.
- Tested APIs using Postman.
- Used Maven for dependency and build management.
- Used Git for source-code management.
- Resolved application issues and production issues reported by users.
- Participated in application maintenance, debugging and bug fixing.

DEPARTMENT OF LAND RESOURCES (DoLR), GOVERNMENT OF INDIA

Java / Spring Boot Developer

Location: New Delhi, Delhi, India

Employment: July 2023 – September 2025

The Department of Land Resources (DoLR) is a Government of India department under the Ministry of Rural Development, headquartered in New Delhi.

Key Responsibilities

- Developed and maintained web-based applications using Java and Spring Boot.
- Developed REST APIs for application modules.
- Implemented business logic using Spring Boot service-layer architecture.
- Worked with Hibernate/JPA for database integration.
- Worked with MySQL/PostgreSQL databases.
- Implemented API authentication and authorization using Spring Security and JWT.
- Developed APIs for frontend applications to consume application data.
- Worked on bug fixing and resolving application issues.
- Tested REST APIs using Postman.
- Used Git and Maven for source control and project build management.
- Worked with React.js for frontend development and REST API integration.

PROJECT EXPERIENCE

MetaCore Suppliers and Storage – Jen-Tin Warehouse

Client: Adelaide Warehouse & Distribution Service, Australia

Role: Java / Spring Boot Developer

Team Size: 12

Technologies

Java 8, Spring Boot, Spring MVC, Hibernate, JPA, REST API, MySQL/SQL, Maven, JUnit, Git, Jenkins

Description

MetaCore is a Supply Chain and Warehouse Management application used for managing stock between customers, vendors and warehouse operations.

The application supports stock management, order processing, invoicing, tax calculations and reporting. It helps warehouse users manage stock distribution between manufacturing companies, warehouses, retailers and end customers.

Responsibilities

- Developed application modules using Java and Spring Boot.
- Used Spring Dependency Injection.
- Developed business logic using the Service Layer.
- Developed and maintained REST APIs.
- Used Hibernate/JPA for database operations.
- Used Maven for project build and dependency management.
- Tested APIs using Postman.
- Worked on production issues reported by client users.
- Performed debugging, maintenance and bug fixing.

REST API Dashboard with React.js & Spring Boot

Project Type: Personal Practice Project

Role: Full Stack Developer

Technologies

React.js, JavaScript, Spring Boot, Spring Security, JWT, REST API, Hibernate, JPA, MySQL,

Axios, HTML5, CSS3, Bootstrap

Description

Developed a dashboard application using React.js as the frontend and Spring Boot REST APIs as the backend.

The application consumes REST APIs from the React frontend and displays backend data through dashboard components.

Implemented JWT-based authentication and authorization using Spring Security to secure APIs and provide role-based access to application resources.

Responsibilities

- Developed reusable components using React.js.
 - Developed dashboard screens using React.js.
 - Consumed Spring Boot REST APIs using Axios.
 - Implemented login and authentication functionality.
 - Implemented JWT authentication.
 - Implemented role-based authorization.
 - Implemented protected routes.
 - Integrated React frontend with Spring Boot REST APIs.
 - Worked with forms and API response handling.
 - Used Bootstrap for responsive UI development.
-

React.js E-Commerce & Banking Website Practice

Project Type: Personal Practice Project

Role: React.js / Full Stack Developer

Technologies

React.js, JavaScript, HTML5, CSS3, Bootstrap, React Router, Axios, Node.js, Express.js

Description

Developed multiple practice websites using React.js, inspired by real-world e-commerce and banking applications.

The project focused on gaining practical experience in developing responsive user interfaces, reusable React components, routing, forms and API integration.

Used Express.js as the backend to develop APIs consumed by the React frontend.

Responsibilities

- Developed responsive web pages using React.js.
 - Created reusable React components.
 - Implemented routing using React Router.
 - Developed e-commerce-style product listing and product details pages.
 - Developed banking-style dashboard and UI screens for practice.
 - Integrated React frontend with backend APIs.
 - Used Axios for API communication.
 - Developed backend APIs using Node.js and Express.js.
 - Implemented CRUD operations for practice modules.
 - Worked with forms and API response handling.
 - Used Bootstrap for responsive UI development.
-

Spring Boot JMS Messaging Practice Project

Project Type: Personal Practice Project

Role: Java / Spring Boot Developer

Technologies

Java, Spring Boot, JMS, ActiveMQ, REST API, Maven

Description

Developed a practice application using Spring Boot and JMS to understand asynchronous

communication and message-based application architecture.

Responsibilities

- Developed JMS message producer and consumer using Spring Boot.
- Worked with JMS queues for asynchronous message communication.
- Implemented message sending and receiving using Spring Boot JMS.
- Practiced producer-consumer communication between application components.
- Used ActiveMQ as the JMS message broker.
- Developed REST APIs to trigger message publishing.
- Tested message processing and consumer functionality.
- Gained practical understanding of message queues, asynchronous processing and JMS-based communication.

TECHNICAL SKILLS

Category	Skills
Programming Languages	Java, JavaScript, Java 8
Backend	Spring Boot, Spring Core, Spring MVC, Spring Security, REST API, Hibernate, JPA
Microservices	Microservices, RESTful Services
Messaging	JMS, ActiveMQ, Apache Kafka – Basic Knowledge
Frontend	React.js, HTML5, CSS3, JavaScript, Bootstrap, React Router, Axios
JavaScript Backend	Node.js, Express.js
Security	Spring Security, JWT Authentication, Authorization, Role-Based Access Control
Databases	MySQL, PostgreSQL
Build Tools	Maven, Gradle
Version Control	Git
API Testing	Postman
CI/CD	Jenkins
Testing	JUnit
Application Server	Apache Tomcat
IDEs	IntelliJ IDEA, Eclipse, STS
Web Technologies	HTML, CSS, JavaScript, jQuery, AJAX
XML	XML
Operating System	Windows

EDUCATION

Bachelor of Engineering (B.E.)
ITM Gwalior

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.

Rohit Verma
